

## **Application Descriptions**

**7**

### **Common Functional Blocks**

**1**

### **Adjustable E-Mode Channels**

**12**

#### **Summary**

This document provides the specification of the Adjustable E-Mode Channels.

Version 01.00.02 is a KNX Approved Standard.

This document is part of the KNX Specifications v2.1.

# 1 Introduction

## 1.1 Definition

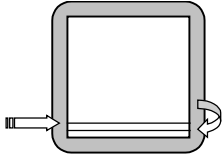

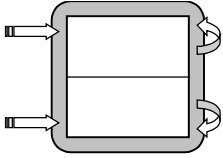

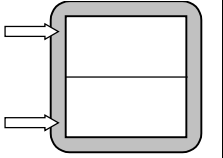

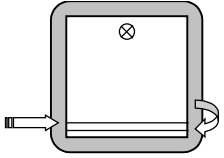

Adjustable E-Mode Channels (or Generic E-Mode Channels) come from the today requirements. These E-Mode Channels are able to work as a lighting switch, as a dimming push button, as a blind sensor, with each function configurable. The Generic E-Mode Channel is based on the feature of an application level process (a controller for example) to adjust the predefined application to its actual target function. The following features are used:

- Standard E-Mode Channels for each implemented function inside the Generic E-Mode Channel.
- Possibility to have E-Mode Channels with dummy Datapoints.
- A Parameter (named Adjustable Select = “ajs”) inside the E-Mode Channel to adjust the used functionality.

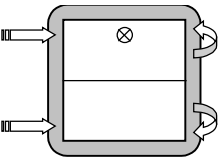

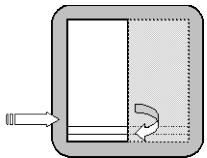

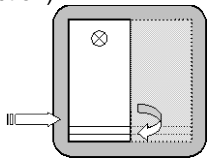

NOTE For localisation in Ctrl-Mode, use the localisation Datapoint of the current selection. If default (not configured), use the Datapoint from the default line in the adjustable table.

## 1.2 Application

The appliance is drawn in the following overview.

Push Button One pressing point release after press	Switch released Two pressing points released after press into independent position	Switch fixed pos Two pressing points staying in last position	Push Button Info One pressing point release after press with indication lamp
			
possible E-Mode Channels	possible E-Mode Channels	possible E-Mode Channels	possible E-Mode Channels
CH_Push-Button	CH_Push-Button <sup>3</sup>	CH_Push-Button <sup>3</sup>	CH_Push-Button <sup>1</sup>

	CH_Switch_Sunblind		
CH_PB_Sunblind_Toggle			CH_PB_Shutter_Toggle <sup>1</sup>

- NOTES
1. Without Info functionality (display status) via feedback.
  2. Info functionality (display status) derived from the Info OnOff Datapoint.
  3. The interaction point is on top and on bottom.
  4. The toggle functionality is on top and on bottom for interaction 1 only.  
The long press on top or on bottom is like standard dimming behaviour.
  5. It is assumed that it is possible to send manually off on second interaction (bottom).
  6. It's critical to use this E-Mode Channel type in parallel.
  7. The use of this function is not clear to the end user.

Switch release end Info	Push Button ½	Push Button ½ Info	Binary contact
Two pressing points released after press into independent position with indication lamp	One pressing point released after press, possibility to combine two of them to one function (= ½-function)	One pressing point release after press with indication lamp, possibility to combine two of them to one function (= ½-function)	Binary input functionality

			CH_Wind_Sensor
			CH_Rain_Sensor

- NOTES
1. The forced state is displayed while listening to the Forced Datapoint.
  2. This is a ½-E-Mode Channel. A second E-Mode Channel of same type is needed for a complete function.

### Localisation Datapoints of Adjustable E-Mode Channels

The localisation of the Adjustable E-Mode Channels shall normally be done with unconfigured adjustment (default). For this use, the localisation Datapoint shall be marked with the L-flag.

On other Configuration Modes than Ctrl-Mode the Localisation flag (L-flag) and localisation Datapoint shall be optional. In Configuration Modes with tool access (Ctrl-Mode) if  $ajs = 0$  it is mandatory to send the localisation Datapoint according to the functionality of the default adjustment.

To adjusted Generic E-Mode Channels there are GAs already assigned to the Datapoints that are valid for the selection. This shall be used for localisation.

## 1.3 Support of scenes

For Scene Number Datapoints, it is mandatory to deal at least with numbers from 1 to 8 (coded 0 to 7). It is allowed to deal with higher values. This shall thus be as specified in Table 1.

**Table 1 – Scene numbering and coding in E-Mode Channels**

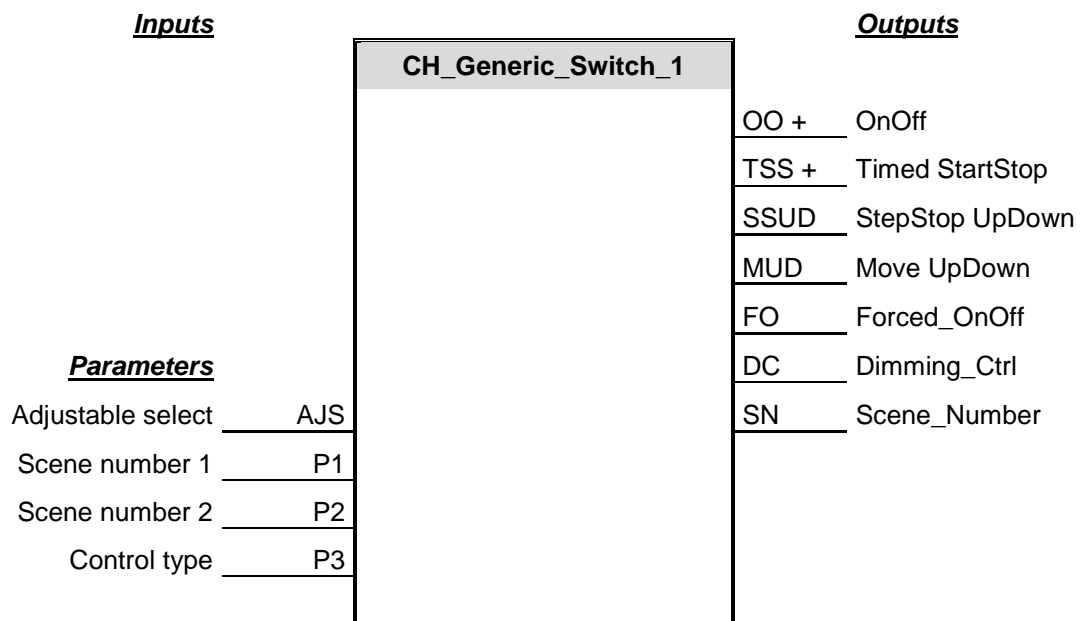

Scene number	Scene letter	Coding
1	A	xx000000b
2	B	xx000001b
3	C	xx000010b
4	D	xx000011b
5	E	xx000100b

6	F	xx000101b
7	G	xx000110b
8	H	xx000111b

## 2 E-Mode Channels

### 2.1 CH\_Generic\_Switch\_1 (Channel Code 0300h)

- **Name:** CH\_Generic\_Switch\_1
- **ID:** 0300h
- **Classification:** sensor
- **Functional Block(s):**
  - 421 - FB Switching Sensor Basic
  - 2 x 403 - FB Scene Sensor
  - 406 – FB PB Timed Sensor
  - 1020 – FB Priority Sensor
  - 420 – FB Dimming Sensor Basic
  - 801 – FB Sunblind Sensor Basic
- **Graphical representation:**

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching, numbered scenes, timed, switch forced, dimming and shutter control.

- **Datapoint list:**

Index	FB / DP_Name	Name	Sub-unit	Main CC	Additional CCs	Flags (i/o,x,v,...)
1	401 / OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L
1	406 / TSS	Timed StartStop	1	CC_Timed		O
1	800 / SSUD	StepStop UpDown	1	CC_StepStop_UpDown		O
2	800 / MUD	Move UpDown	1	CC_Move UpDown	CC_Logical	O
3	405 / FO	Forced_OnOff	1	CC_Forced		O
4	401-410 / DC	Dimmer_Ctrl	1	CC_Dimming_Ctrl		O
5	403 - SN	Scene number	1	CC_Scene_Number		O

- **Adjustable table:**

Selection	Parameter value	Datapoint 1 <i>Output 1 bit</i>	Datapoint 2 <i>Output 1 bit</i>	Datapoint 3 <i>Output 2 bits</i>	Datapoint 4 <i>Output 4 bits</i>	Datapoint 5 <i>Output 8 bits</i>
Default	0 (none)	OO	-	-	-	-
Switch	CH_Switch	OO	-	-	-	-
Dimming	CH_Switch_Dimmer	OO	-	-	DC	-
Sunblind	CH_Switch_Sunblind	SSUD	MUD	-	-	-
Timed	CH_Timed StartStop	TSS	-	-	-	-
Scene	CH_Switch_Scene_Number	-	-	-	-	SN
Forced	CH_Switch_Forced	-	-	FO	-	-

The corresponding parameter to this adjustable table is parameter index 1 Adjustable selection.

The parameter value corresponds to the E-Mode Channel ID.

- **Parameter table:**

Index	Identifier	Name	Type	Recommended default value	Bit Offset
1	AJS	Adjustable selection	PART_Adaptive_Selection	none (=0)	0
2	P1	Scene number 1	PART_Scene_Number	0	10
3	P2	Scene number 2	PART_Scene_Number	0	18
2	P3	Control type	PART_Boolean	0: Ctrl FALSE	15

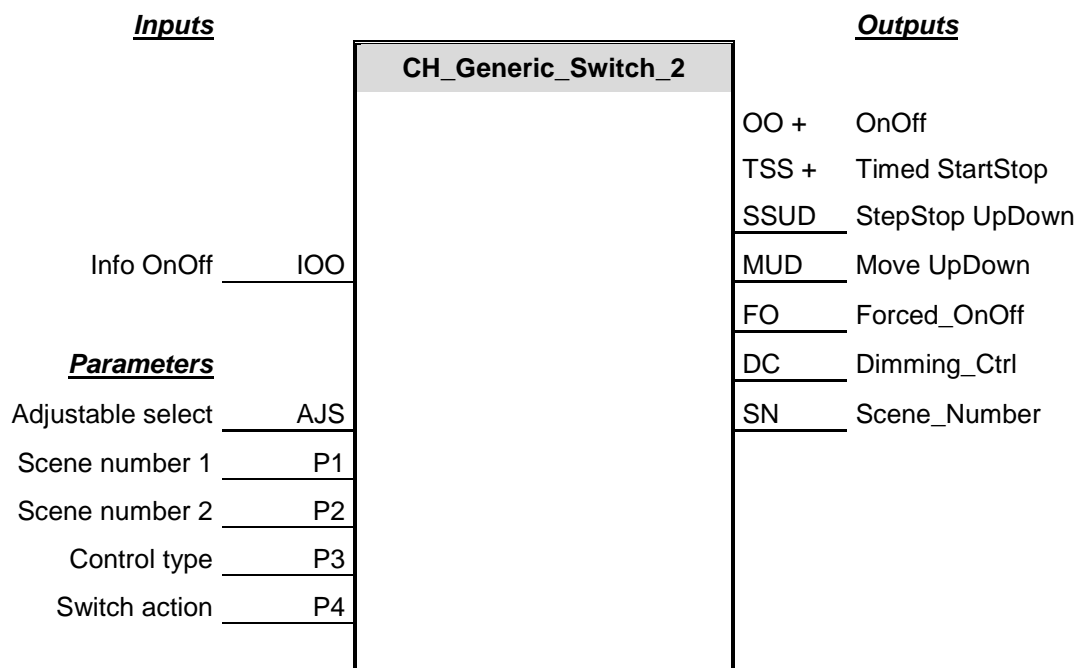

- **Parameter overview:**

0	8	16	23
Adjustable selection = 0 (none)			
Adjustable selection = 1 (switch)			
Adjustable selection = 2 (Switch_Dimmer)			
Adjustable selection = 3 (Switch_Sunblind)			
Adjustable selection = 4 (Timed)			
Adjustable selection = 5 (Scene Number)	Scene Number 1	Scene number 2	
Adjustable selection = 6 (Forced)	Control Type →		

## 2.2 CH\_Generic\_Switch\_2 (Channel Code 0301h)

- **Name:** CH\_Generic\_Switch\_2
- **ID:** 0301h
- **Classification:** sensor
- **Functional Block(s):**
  - 3 x 421 - FB Switching Sensor Basic
  - 2 x 420 – FB Dimming Sensor Basic
  - 801 – FB Sunblind Sensor Basic
  - 406 – FB PB Timed Sensor
  - 2 x 403 - FB Scene Sensor
  - 1020 – FB Priority Sensor
- **Graphical representation:**

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching, numbered scenes, timed, switch forced, dimming and shutter control.

- **Datapoint list:**

Index	FB / DP_Name	Name	Sub-unit	Main CC	Additional CCs	Flags (i/o,x,y,...)
1	407-413 / IOO	Info OnOff	1	CC_Switch_OnOff_Status		I
2	400-407-410-411-413 / OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L
2	406 / TSS	Timed StartStop	1	CC_Timed		O
2	800 / SSUD	StepStopUpDown	1	CC_StepStop_UpDown		O
3	800 / MUD	Move UpDown	1	CC_Move_UpDown	CC_Logical	O
4	405 / FO	Forced_OnOff	1	CC_Forced		O
5	410-411/DC	Dimmer_Ctrl	1	CC_Dimming_Ctrl		O
6	403 / SN	Scene number	1	CC_Scene_Number		O

- **Adjustable table:**

Selection	Parameter value	Datapoint t 1 <i>Input 1 bit</i>	Datapoint t 2 <i>Output 1 bit</i>	Datapoint t 3 <i>Output 1 bit</i>	Datapoint t 4 <i>Output 2 bits</i>	Datapoint t 5 <i>Output 4 bits</i>	Datapoint t 6 <i>Output 8 bits</i>
Default	0 (none)	-	OO	-	-	-	-
Switch	CH_Switch	-	OO	-	-	-	-
Dimming	CH_Switch_Dimmer	-	OO	-	-	DC	-
Sunblind	CH_Switch_Sunblind	-	SSUD	MUD	-	-	-
Timed	CH_Timed_StartStop	-	TSS	-	-	-	-
Scene	CH_Switch_Scene_Number	-	-	-	-	-	SN
Forced	CH_Switch_Forced	-	-	-	FO	-	-
PB	CH_Push_Button	-	OO	-	-	-	-
Toggle	CH_PB_Toggle	IOO	OO	-	-	-	-
Dimming Toggle	CH_Switch_Dimmer_Toggle	IOO	OO	-	-	DC	-

The corresponding parameter to this adjustable table is parameter index 1 Adjustable selection.

The parameter value corresponds to the E-Mode Channel ID.

- **Parameter table:**

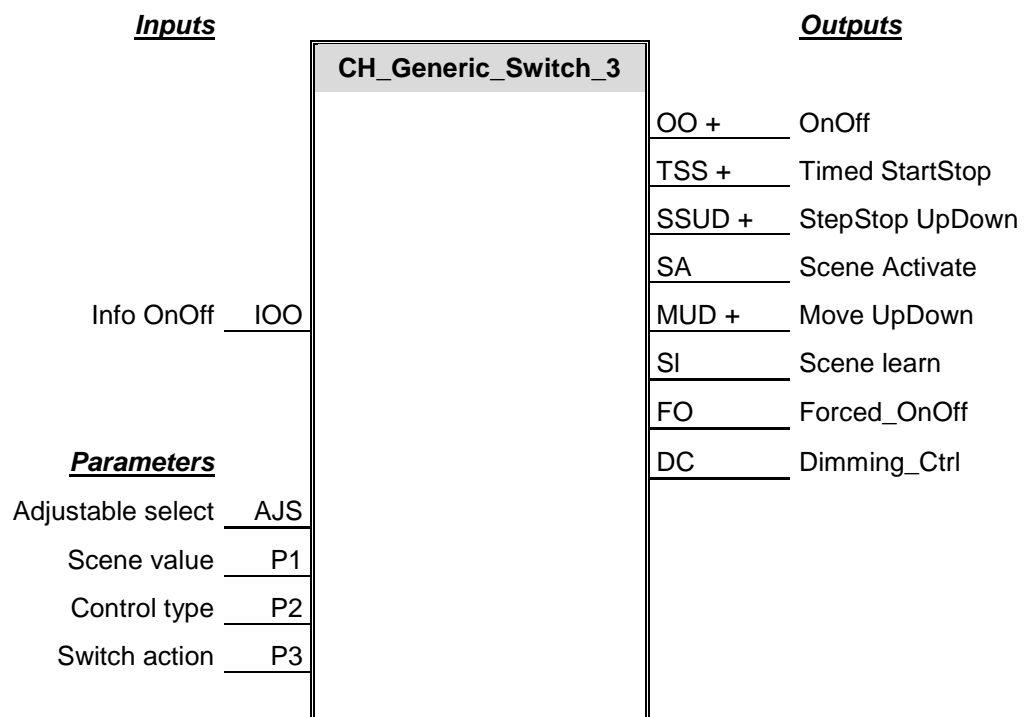

Index	Identifier	Name	Type	Recommended default value	Bit Offset
1	AJS	Adjustable selection	PART_Adaptive_Selection	none (=0)	0
2	P1	Scene number 1	PART_Scene_Number	0	10
3	P2	Scene number 2	PART_Scene_Number	0	18
2	P3	Control type	PART_Boolean	0: Ctrl FALSE	15
2	P4	Switch action	PART_OnOff_Action	11b: OnOff	14

**Parameter overview**

0	8	16	23
Adjustable selection = 0 (none)			
Adjustable selection = 1 (switch)			
Adjustable selection = 2 (Switch_Dimmer)			
Adjustable selection = 3 (Switch_Sunblind)			
Adjustable selection = 4 (Timed)			
Adjustable selection = 5 (Scene Number)		Scene Number 1 	Scene number 2 
Adjustable selection = 6 (Forced)	Control Type →		
Adjustable selection = 7 (Push button)	Switch action →		
Adjustable selection = 8 (PB toggle)			
Adjustable selection = 9 (Switch Dimmer toggle)			

## 2.3 CH\_Generic\_Switch\_3 (Channel Code 0302h)

- **Name:** CH\_Generic\_Switch\_3
- **ID:** 0302h
- **Classification:** sensor
- **Functional Block(s):**
  - 4x 421 - FB Switching Sensor Basic
  - 420 – FB Dimming Sensor Basic
  - 801 – FB Sunblind Sensor Basic
  - 406 – FB PB Timed Sensor
  - 2 x 403 – FB Scene Sensor
  - 1020 – FB Priority Sensor
- **Graphical representation:**

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching, numbered scenes, timed, switch forced, dimming and shutter control, and see equivalent descriptions.

- **Datapoint list:**

Index	FB / DP_Name	Name	Sub unit	Main CC	Additional CCs	Flags (i/o,x,v,...)
1	407-411/IOO	Info OnOff	1	CC_Switch_OnOff_Status		I
2	400-401-407-410-411/OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L
2	406/TSS	Timed StartStop	1	CC_Timed		O
2	800/SSUD	StepStop UpDown	1	CC_StepStop_UpDown		O
2	404/SA	Scene activate	1	CC_Activate		O
3	800/MUD	Move UpDown	1	CC_Move_UpDown	CC_Logical	O

3	404/SL	Scene Learn	1	CC_Learn		O
4	405/FO	Forced_OnOff	1	CC_Forced		O
5	410-411/DC	Dimmer_Ctrl	1	CC_Dimming_Ctrl		O

- **Adjustable table:**

Selection	Parameter value	Datapoint t 1 <i>Input 1 bit</i>	Datapoint t 2 <i>Output 1 bit</i>	Datapoint t 3 <i>Output 1 bit</i>	Datapoint t 4 <i>Output 2 bits</i>	Datapoint t 5 <i>Output 4 bits</i>
Default	0 (none)		OO	-	-	-
Switch	CH_Switch		OO	-	-	-
Dimming	CH_Switch_Dimmer		OO	-	-	DC
Sunblind	CH_Switch_Sunblind		SSUD	MUD	-	-
Timed	CH_Timed_StartStop		TSS	-	-	-
Scene	CH_Switch_Scene		SA	SL	-	-
Forced	CH_Switch_Forced		-	-	FO	-
PB	CH_Push_Button	-	OO	-	-	-
Toggle	CH_PB_Toggle	IOO	OO	-	-	-
Dimming Toggle	CH_Switch_Dimmer_Toggle	IOO	OO	-	-	DC

The corresponding parameter to this adjustable table is parameter index 1 Adjustable selection.

The parameter value corresponds to the E-Mode Channel ID.

- **Parameter table:**

Index	Identifier	Name	Type	Recommended default value	Bit Offset
1	AJS	Adjustable selection	PART_Adaptive_Selection	none (=0)	0
2	P1	Scene value	PART_Scene_Value	1	15

## 2.7 CH\_Generic\_Switch\_FixedPos\_1 (Channel Code 0306h)

- **Name:** CH\_Generic\_Switch\_FixedPos\_1

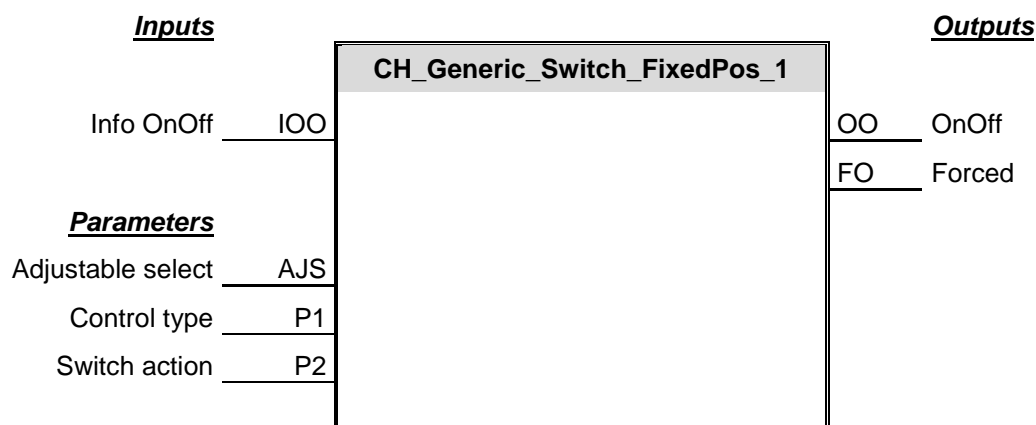

- **ID:** 0306h

- **Classification:** sensor

- **Functional Block(s):**

- 421 - FB Switching Sensor Basic
- 1020 – FB Priority Sensor
- 421 – FB Switching Sensor Basic
- 421 – FB Switching Sensor Basic

- **Graphical representation:**

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching

- **Datapoint list:**

Index	FB / DP_Name	Name	Subunit	Main CC	Additional	Flags
-------	--------------	------	---------	---------	------------	-------

					CCs	(i/o,x,v,...)
1	407/IOO	Info OnOff	1	CC_Switch_OnOff_Status		I
2	400-401-407/OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L
3	405/FO	Forced	1	CC_Fforced		O

- **Adjustable table:**

Selection	Parameter value	Datapoint 1 <i>Input 1 bis</i>	Datapoint 2 <i>Output 1 bit</i>	Datapoint 3 <i>Output 2 bit</i>
Default	0 (none)	-	00	-
Toggle	CH_PB_Toggle	100	00	-
Switch	CH_Switch	-	00	-
PB	CH_Push_Button	-	00	-
Forced	CH_Switch_Fforced	-	-	FO

The corresponding parameter to this adjustable table is parameter index 1 Adjustable selection.

The parameter value corresponds to the E-Mode Channel ID.

- **Parameter table:**

Index	Identifier	Name	Type	Recommended default value	Bit Offset
1	AJS	Adjustable selection	PART_Adaptive_Selection	none (=0)	0
2	P1	Control type	PART_Boolean	0: Ctrl FALSE	15
2	P2	Switch action	PART_OnOff_Action	11b : OnOff	14

- **Parameter overview**

0	8	15
Adjustable selection = 0 (none)		
Adjustable selection = 1 (PB toggle)		
Adjustable selection = 2 (switch)		
Adjustable selection = 3 (Push button)	Switch action →	
Adjustable selection = 4 (Forced)	Control Type →	

## 2.8 CH\_Generic\_Switch\_FixedPos\_2 (Channel Code 0307h)

- **Name:** CH\_Generic\_Switch\_FixedPos\_2
- **ID:** 0307h
- **Classification:** sensor
- **Functional Block(s):**
  - 421 - FB Switching Sensor Basic
- **Graphical representation:**

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching

- **Datapoint list:**

Index	FB / DP_Name	Name	Subunit	Main CC	Additional CCs	Flags (i/o,x,v,...)
1	407/IOO	Info OnOff	1	CC_Switch_OnOff_Status		I
2	400-401-407/OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L

- **Adjustable table**

Selection	Parameter value	Datapoint 1 <i>Input 1 bis</i>	Datapoint 2 <i>Output 1 bit</i>
Default	0 (none)	-	OO
Toggle	CH_PB_Toggle	IOO	OO
Switch	CH_Switch	-	OO
PB	CH_Push_Button	-	OO

The corresponding parameter to this adjustable table is parameter index 1 Adjustable selection.

The parameter value corresponds to the E-Mode Channel ID.

- **Parameter table:**

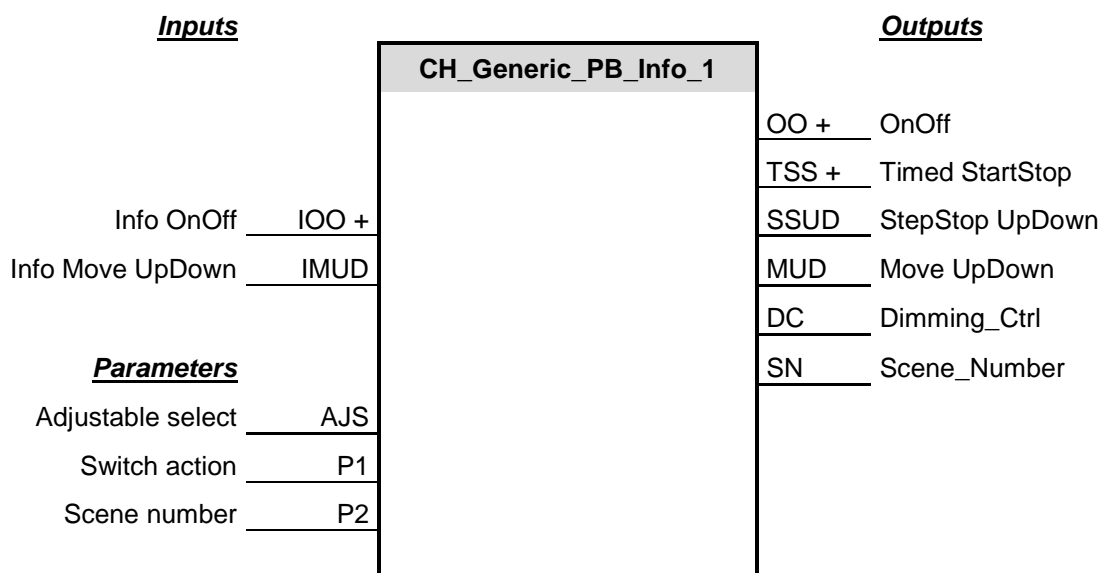

Index	Identifier	Name	Type	Recommended default value	Bit Offset
1	AJS	Adjustable selection	PART_Adaptive_Selection	none (=0)	0
2	P1	Switch action	PART_OnOff_Action	11b : OnOff	14

- **Parameter overview**

0	8	15
Adjustable selection = 0 (none)		
Adjustable selection = 1 (PB toggle)		
Adjustable selection = 2 (switch)		
Adjustable selection = 3 (Push button)	Switch action →	

## 2.9 CH\_Generic\_PB\_Info\_1 (Channel Code 0308h)

- **Name:** CH\_Generic\_PB\_Info\_1
- **ID:** 0308h
- **Classification:** sensor
- **Functional Block(s):**
  - 2x 421 – FB Switching Sensor Basic
  - 420 – FB Dimming Sensor Basic
  - 801 – FB Sunblind Sensor Basic
  - 403 - FB Scene Sensor
  - 406 – FB PB Timed Sensor
- **Graphical representation:**

- 

- **Description:**

This E-Mode Channel groups functionality from the given Functional Blocks to a generic switch with ability for switching, numbered scenes, timed, switch forced, dimming and shutter control.

**REMARK** To avoid multiplication of generic PB, this E-Mode Channel is usable even if no info is displayed to the user.

- **Datapoint list:**

Index	FB / DP_Name	Name	Sub unit	Main CC	Additional CCs	Flags (i/o,x,v,...)
1	407-413/IOO	Info OnOff	1	CC_Switch_OnOff_Status		I
1	801/IMUD	Info MUD	1	CC_Move_UpDown_Status		I
2	400-407-413/OO	OnOff	1	CC_Switch_OnOff	CC_Logical	O L
